Conventions Used in this Document

- Lists:
    - Numbered lists are used to show the steps involved in completing a task when the order is important
    - Bulleted lists are used when the order is unimportant or to show alternatives

- **Bold** is used for menu items and for labels.

    For example:
    - "Record a valid email address in **'From' email address**"
    - Select **Save** from the **File** menu

- *Italic* is used for emphasis and to indicate references to other sections within the current document:

    For example:
    - "Copy the file *before* starting the installation"
    - "See *Issuing a Card* for further information"

- ***Bold and italic*** are used to identify the titles of other documents.

    For example: "See the ***Release Notes*** for further information."

    Unless otherwise explicitly stated, all referenced documentation is available on the product CD.

- A `fixed width` font is used where the identification of spaces is important, including filenames, example SQL queries and any entries made directly into configuration files or the database.

- **Notes** are used to provide further information, including any prerequisites or configuration additional to the standard specifications.

    For example:

    Note: This issue only occurs if updating from a previous version.

- Warnings are used to indicate where failure to follow a particular instruction may result in either loss of data or the need to manually configure elements of the system.

    For example:

Warning:	You must take a backup of your database before making any changes to it.

Contents

1 Introduction

A Personal Identity Verification (PIV) card is a secure identity card issued by Federal agencies in accordance with the specifications laid out in FIPS 201. A PIV-interoperable (PIV-I) card is a non-Federal version of the same technology used by Federal contractors to access Federal buildings and networks.

CIV is *Commercial* Identity Verification – it is a method of using the PIV-I technology, specifications and data model without requiring cross-certification with Federal agencies. In short, it is a way of using PIV cards for your own organization.

1.1 Change history

Version	Description
IMP1739-01	First release.
IMP1739-02	Rebranding.
IMP1739-03	Updated for latest version.
IMP1739-04	Updated for latest version.
IMP1739-05	Documentation updated to use the latest templates.

1.2 Documentation

The following documents are provided with the MyID CIV module:

- ***readme.html***

  The readme file provided with the patch contains information on pre-requisites and the procedure for installing the CIV module.

- ***CIV Release Notes***

  This document.

  Contains information about the current and previous versions of the CIV module along with any known issues in this release.

- ***CIV Integration Guide***

  Contains information about setting up your system to issue PIV cards as part of a CIV system.

1.3 In this release

Release CIV-10.8.1000.1 contains no functional changes over release CIV-10.7.1000.1.

1.4 Previously in CIV-10.7.1000.1

1.4.1 Support for CNG signing certificates

In previous versions of MyID, the signing certificate used for PIV and CIV had to be protected by CAPI (Cryptographic Service Provider). You can now use CNG (Key Storage Provider) as an alternative.

For more information, see the *Configure server signing certificates* section in the ***CIV Integration Guide***.

2 Known Issues

There are currently no known issues with the CIV module.
